Tools needed:

- Phillips-head screwdriver
- 7/16" wrench (multiple size wrench included)
- Scissors or box cutter
- Cardboard shipping container (stays under table during assembly to protect upholstery)
- If using powered tools, always start hardware together by hand first and wear safety goggles.

PLEASE READ AND FAMILIARIZE YOURSELF WITH ALL INSTRUCTIONS BEFORE PROCEEDING WITH ASSEMBLY

SEE "Parts Reference" (pg.3) for visual reference during assembly.

1. After checking your product for any shipping damage, table needs to be positioned upside-down on cardboard or protective surface. Remove all packing material and hardware that was secured for shipping. Cut tape on corners of box so that cardboard will lay flat while you assemble table.
2. You will find two **Table Legs**, in-between and attached to the **Table Frame Rails**. Pivot up the **Table Legs** and install one (1) ¼-20 x 2 ½ machine screw through the outer, empty hole of the **Table Frame Rails**, followed by hand threading (1) ¼-20 hex lock nut onto the screw, connecting each **Table Leg** to the frame.

NOTE: The table legs have braces that need to align with two threaded holes in the wood of the **Upholstered Top**.

3. Install (4) ¼-20 x 1-½" screws through (2) holes in each **Upper Leg Brace** of the **Table Legs**, and into (2) threaded holes (each end) in the wood of the **Upholstered Top**.

NOTE: Do not fully tighten at this time.

4. Place (4) ¼-20 x 1-½" carriage bolts into the (4) holes through the **Lower Leg Brace** of the **Table Legs**. Heads of screws should face the ends of table, for better appearance.

5. Align the **Cross-brace** (smoothest side up) with the (4) screws that you just installed on step 4, and fasten with (4) 1/4-20 nuts.

If the **Optional Shelf** and **Reinforced Cross-brace** have been ordered; make sure that the smooth surface (side with tape) of the **Cross-brace** will face upward (when the table is in the upright position) prior to fastening to **Table Legs**.

6. TIGHTEN ALL nuts and bolts at this time.
7. Install the four (4) **Threaded Inserts** with **Glide Feet** into the ends of the table legs.
8. Using at least two people, turn table upright.
9. Remove (1) of the white plastic caps on the **Paper Rod** and install into the (2) **Paper Rod Clamps**, replace cap. Adjust (4) 5/16" **Glide Feet** to level table.

Optional Shelf installation:

10. Double-sided tape has been installed on the **Reinforced Cross-brace**.
11. Before removing paper on tape, "test fit" the shelf. Shelf should be approximately 1/4" from edge of the **Lower Leg Brace** of the **Table Legs**.
12. Once you are certain of where you will position the shelf, peel off the paper to expose adhesive.

*After peeling paper from adhesive tape:
Use damp sponge to moisten tape to allow shelf to be adjusted during install.
Once tape is dry shelf will stay in place.*

13. Carefully position shelf in place on adhesive.

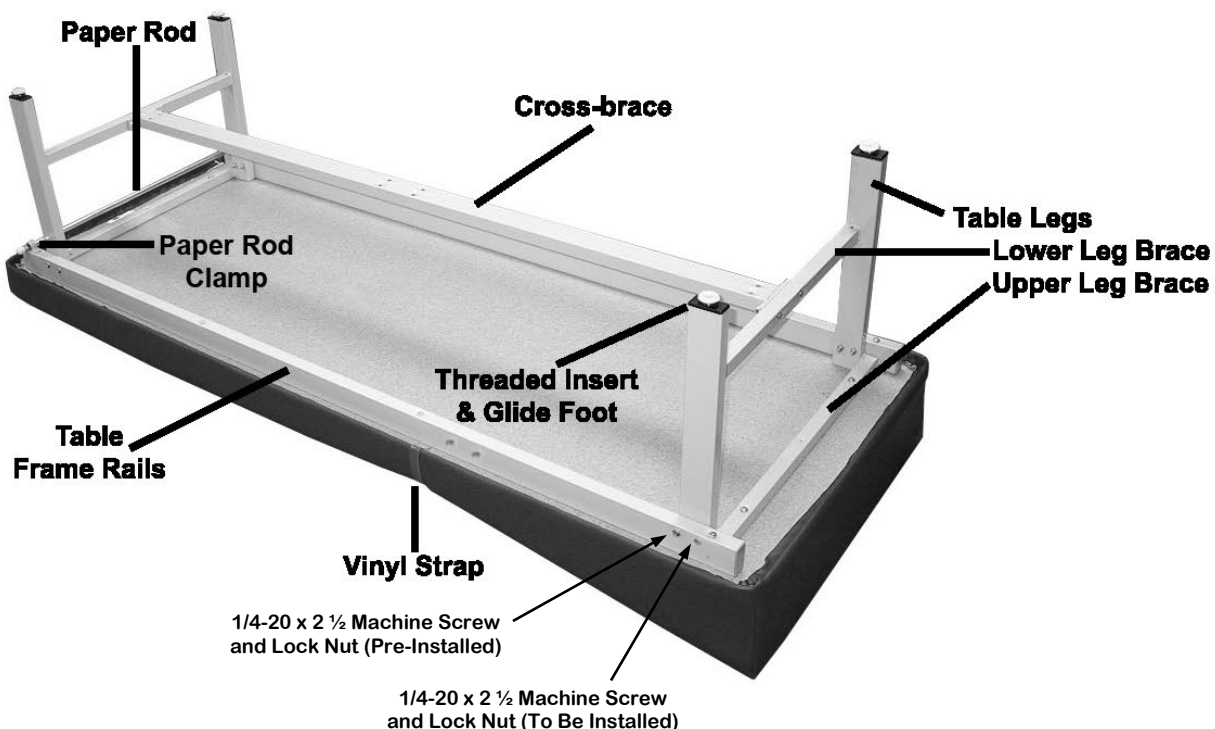

Vinyl Strap Adjustment – Should the vinyl strap on your Winco table need to be adjusted, unscrew the screw that currently holds either side of it in place. Pierce another hole in the strap to give desired tension and re-insert screw.

Wrinkles in Vinyl – Storage and shipping can cause wrinkles of the vinyl on your Winco table. This is normal. Please allow 1-2 weeks at room temperature (approx. 70 degrees) to allow for vinyl to expand back to original appearance.

Do not over tighten nuts and bolts. Periodically check all fasteners for tightness.

Parts Reference

GENERAL CARE AND CLEANING:

Periodically inspect tightness of all screws, bolts, and nuts. Winco furnishings are built to provide durable reliable service when properly cared for. In general, all our products should be cleaned, rinsed, and allowed to air dry. It is important to note that disinfecting a product is not the same as cleaning the product. Disinfectants alone will not provide adequate cleaning. They do not have grease or oil cutting properties to remove grime or hair and skin oils. Over time, the appearance, feel, and performance of your upholstery may diminish if not cleaned properly.

CLEANING:

To remove grime, hair, and body oils, your furnishings should be cleaned with mild soap and water solution, and a damp cloth on a regular basis. Avoid harsh detergents that could damage the finish of your product. If the furnishing is disinfected with bleach, it **MUST** be wiped off using only clean water on a damp cloth and then be allowed to air dry. Failure to rinse with clean water can result in a build-up of residues over time that can damage your product.
